

DOUBLE MALE SYMBOL 01

GAYTHER COLOUR AND LEARN

Represents gay men (men loving men)

The double male symbol consists of two interlocking Mars symbols, traditionally associated with masculinity. The single Mars symbol originates from the astronomical and astrological symbol for Mars; its use to represent men later became widespread in biology and other fields.

INTERESTING FACT

Studies of identical twins suggest that genetics play a role in sexual orientation. However, there is no single “gay gene”; rather, many genetic and environmental factors appear to interact in complex ways.
