

INTERSEX CIRCLE 08

GAYTHER COLOUR AND LEARN

Represents intersex identities (wholeness and bodily autonomy)

The purple circle on a yellow background was created by Morgan Carpenter in 2013. The unbroken, unadorned circle has become a powerful visual symbol of intersex identity. Its deliberately simple design also rejects the idea that intersex bodies need to be “fixed” or fitted into traditional gender categories.

INTERESTING FACT

Intersex is an umbrella term for natural variations in sex characteristics. These can involve chromosomes, hormones, reproductive anatomy, or genital development, including variations such as XXY and XO chromosome patterns.
